PREFACE

THIS volume describes the Collection of Indo-Greek coins in the Lahore Museum, Panjab, India. I have applied the term Indo-Greek to the issues of the Greek Kings of Bactria and India, and of their contemporaries and immediate successors in North-West India, who struck money bearing legible Greek inscriptions. These were the Indo-Scythic and Indo-Parthian dynasties, and the Great Kushāns, down to and including Vasu Deva.¹

The coins in the Lahore Museum were contained in two separate Collections. One was the Government Collection proper, and the other was the Cabinet of Mr. C. J. Rodgers, a well-known figure in Indian numismatics, a Collection which was purchased by the Panjab Government. Mr. Rodgers prepared Catalogues under official auspices, both of the Government Collection and of his own Cabinet; and these were printed at the Baptist Mission Press, Calcutta, in the years 1892 to 1894. Neither work was illustrated, a fact which has detracted much from their value.

In the Preface to one of the Parts of his Catalogue, Mr. Rodgers mentions the fact that at the beginning of his career as a coin collector, he specialised in the issues of the Indo-Greeks. But he found that they were so difficult to obtain, and that such a large outlay was necessary for their

¹ The epithet Indo-Greek, to be strictly accurate, is only applicable to the coins of the Greeks in India and on the Indian Frontier. It cannot cover the Kushāns, except in the abbreviated sense in which I have used it in the title of this work.

acquisition, that he turned his attention to Mughal coins, and left the ancient coins to his friend General (afterwards Sir Alexander) Cunningham. Nevertheless the Indo-Greek section of his Cabinet was not to be despised, and it was very strong in the copper series. The Government Collection contained some good Greek coins, and there were a few very fine specimens in a small but valuable supplementary Collection, which is described in the Government Collection Catalogue, and was apparently purchased en bloc, probably from Mr. C. J. Rodgers himself, by means of a special grant. Then there were also the coins purchased from time to time during the nineteen years which have elapsed since the production of Mr. Rodgers' Catalogue.

The Indo-Greek coins of the Bleazby Collection were purchased for the Lahore Museum in the year 1911. They cost £800, and this expenditure was met in equal shares by the Government of India, and by the Panjab Government. The splendid Collection of which they formed part, was made by Mr. G. B. Bleazby, late of the Financial Department of the Government of India, during a long career spent in North-West India.

It was felt that the time had arrived for the incorporation of all these coins into one combined Collection, and for the production of a new Greek Catalogue. I was asked to carry out this work. A new Catalogue of the combined Mughal coins in the Lahore Museum has been prepared simultaneously with this volume.

For convenience of treatment I have divided this work into three parts, to each of which I have written a brief Introduction. The first treats of the coins of the Greek Kings of Bactria and India. The second describes the issues of the Indo-Scythians and of the Indo-Parthians, and the third the coins of the Kushāns. The distinction between Indo-Scythians and Indo-Parthians is at present largely conventional. In Volume I of the recently-produced Indian

Museum Catalogue, Mr. Vincent Smith calls both dynasties Indo-Parthian.

The intrinsic interest of the coins described in this work is great, and they make a strong appeal to the favourable notice of collectors, especially to those belonging to that European nation which is the first to have accomplished from the sea what Greece did from the land, and so may be regarded as the legitimate successor of the Greeks in the Panjab. Mr. Stuart Poole remarked in his Preface to the British Museum Catalogue of the Coins of the Greek and Scythic Kings of Bactria and India, that few fields of numismatics offer richer material, historical, archaeological, and even philological. To a very large extent these contemporary documents in metal are the only testimonies to a period which would otherwise have disappeared from history. The names of Menander and Apollodotos are just mentioned by classical annalists, but those of the numerous other Indo-Greek princes are merely found on their coins, and till four years ago no other epigraphical evidence of their existence was known. But now we have the inscription at Besnagar in the Gwalior State, which relates that the stone pillar on which it is inscribed was erected by Heliodoros, son of Dion, a subject of the great king Antalkidas of Taxila, the ruler whose name is familiar from his coins in the form Antialkidas. This is one of the several remarkable discoveries recently made by the Archaeological Department of India.

The historical importance of these coins is not confined to the issues of the Greek princes. Our knowledge of the Indo-Scythians, Indo-Parthians, and Kushāns is again almost entirely derived from the study of their coins ; and the interest is strengthened by the fact that the coins of the Indo-Parthians give us the name of Gondophares, known to Christian tradition as the Indian ruler under whom the Apostle St. Thomas was martyred. Then on the coins of the Kushāns we have the name of Kanishka, known to fame as the convener of the

fourth great Buddhist Council, the Council which gave consistency and official sanction to the doctrines of Northern Buddhism.

As regards the philological importance of the Indo-Greek coins, it must not be forgotten that they provided the key to the Kharoṣṭhi script. Many documents written in the Kharoṣṭhi character have been discovered recently by Sir Aurel Stein in Khotan. A further interest lies in the shape of these coins, many of them being square or oblong, and in the characteristic designs of gods and animals as conceived by the oriental Greek artist.

I have modelled this Catalogue on Professor Gardner's *The Coins of the Greek and Scythic Kings of Bactria and India in the British Museum*, which, though published in 1886, is still the best guide to the student. I have derived much assistance from the first volume of the Indian Museum Coin Catalogue, by Mr. Vincent A. Smith. This was published at the Clarendon Press in 1906. In the Introduction I have used material from my paper 'The Place of Coins in Indian History' (*Journal of the Panjab Historical Society*). I have been unable to arrange for a Kharoṣṭhi fount for the inscriptions in this language. The system of transliteration is that used by G. Bühler in his well-known palaeographical tables published in the *Grundriss der Indo-Arischen Philologie*.

It is hoped that the information contained in the Text will be found accurate and up to date. Points worthy of attention have been noticed in the body of the Catalogue. I have done my best to exclude forgeries. The one or two doubtful coins which have been included, are marked with an asterisk. The Catalogue contains lists of coins unrepresented in the Museum, which lists I have made as complete as possible. Supplementary Plates at the end of each Section contain reproductions of important and interesting coins which are absent from this Collection.

Owing to the comparatively small scope of this work,

I have thought it unnecessary to prepare any Index. The names of the rulers represented appear in the List of Contents. The Bleazby coins are distinguished throughout by the initials G. B.

All the work of preparation of the Catalogue has been done in the Department of Coins and Medals, British Museum, with the permission of Mr. G. F. Hill, Keeper of the Coins, and I desire to thank him and his colleagues for their kindness and help. I am especially indebted to Mr. J. Allan, who has generously placed the whole of his knowledge of these coins at my service, and whose intimate acquaintance with the bibliography of the subject has been essentially valuable. The Plates illustrating this work have been produced from casts by the collotype process at the Clarendon Press.

Professor E. J. Rapson and Dr. J. F. Fleet have kindly helped me in the elucidation of one or two difficult points. I am further indebted to Mr. J. Allan for reading through the proofs of this Catalogue. Finally, I wish to thank the Staff of the Clarendon Press for the promptitude and accuracy of their work.

R. B. WHITEHEAD.

SECTION I

COINS OF THE GREEK KINGS OF
BACTRIA AND INDIA

INTRODUCTION

THE romance of the discovery of Greek coins in India is well told by Professor H. H. Wilson in *Ariana Antiqua* (London, 1841). Coins of Apollodotos and Menander were published for the first time by Colonel Tod in the first volume of the transactions of the Royal Asiatic Society, 1824. The coins described and figured became the subject of an interesting and learned dissertation by Augustus Wilhelm von Schlegel, which appeared in the *Journal Asiatique*, November, 1828. Of the medals of Apollodotos and Menander, Schlegel observes, 'ces deux médailles sont, pour ainsi dire, hors de prix tant pour la conservation parfaite que pour leur extrême rareté et leur importance historique.' Their historical importance remains undiminished, but their attribute of rarity was soon to be changed through the discoveries of the American explorer Masson in Afghanistan. Mr. Masson resided for some time in that country, and during the years 1833 to 1837 he succeeded in accumulating some thirty thousand coins from the Kabul Valley and its vicinity. The far greater proportion of these must have been too much injured by corrosion to have had any other than metallic value, but several new names of Greek princes unknown to history were found, such as Archebios, Lysias, and Hermaios, and numerous pieces of what are now called the Indo-Scythians, Indo-Parthians, and Kushāns. Meanwhile collateral progress in the decipherment of the legends was being made in India by James Prinsep, and in Europe by such savants as M. Raoul Rochette and Lassen. The results of Prinsep's labours are embodied in his *Essays on Indian Antiquities*, a scholarly work of the first rank, but now out of date. Another early worker in this field was Cunningham, who as Lieutenant A. Cunningham wrote on these coins in the *Journal of the Asiatic Society of Bengal* for 1834, and as General Sir Alexander Cunningham crowned his long and devoted labours on the Indo-Greek series of coins by producing the fully informed and striking essays which appeared in the *Numismatic Chronicle* during the years 1868 to 1892, under the titles of 'The Coins of Alexander's Successors in the East, Greeks, Indo-Scythians, and Parthians', 'The Coins of the Śakas', 'The Coins of the Kushāns', and so on. The objection has been raised that these papers, although of great value, require to be read with caution,

being disfigured by an excessive amount of fanciful conjecture. Perhaps this criticism applies with the greatest force to Cunningham's attempts at explaining the monograms—see *British Museum Catalogue*, Introduction, p. xxxviii. But I think it would be equally difficult to prove or disprove the truth of these theories, and no one else has so far ventured to grapple with the subject. Cunningham may have attempted too much, but these essays still remain the only full accounts of the Indo-Greek series of coins, and are remarkable testimony to the knowledge and ingenuity of their author. During the sixty years covered by his activities, Cunningham, who eventually became Director of Archaeology in India, was an unremitting collector of Indo-Greek coins, and spared neither trouble nor expense in their acquisition. The result is to be seen in the truly superb Cabinet of Indo-Greek medals in the British Museum, which contains his entire Collection. Almost every known type and variety, some of which are still unpublished, are to be seen, and many of the rarest coins are represented by several specimens.

A companion to Cunningham's *Coins of Alexander's Successors in the East* is Von Sallet's *Die Nachfolger Alexanders des Grossen in Baktrien und Indien* (Berlin, 1879). A well-known modern worker in the same field is Professor E. J. Rapson, who amongst other essays has written papers entitled *Indian Coins*, *Notes on Indian Coins and Seals*, and *Coins of the Graeco-Indian Sovereigns Agathocleia, Strato I Soter, and Strato II Philopator*.

It is a mistake to suppose that the Greek princes of the Panjab and the North-West Frontier were the direct successors of Alexander the Great. The Macedonian conqueror did not leave behind him any permanent settlements in India itself, but a Greek kingdom was firmly established in Syria under Seleukos and his successors, and it was from a province of this new kingdom that the second Greek invasion of India came, more than a century after Alexander's death. That province was Bactriana or Bactria, the country north of the Hindu Kush, whose capital was on the site of the present Balkh. We learn from the brief statements of the historians Trogus, Justin, and Strabo, that Diodotos, the satrap of Bactriana, took advantage of the disturbances which followed the death of Antiochos Theos, to make himself independent. The date of his revolt was about 246 B. C. It is also known from history that Diodotos was succeeded by his son of the same name, who was supplanted by Euthydemus; and that Demetrios, the son of Euthydemus, was deposed by Enkratides, who was himself murdered, and succeeded by his own son, of name unknown. It was Euthydemus who extended the Bactrian power into the Kabul Valley, and so to India proper, and

the Greek conquest of the North-West Panjab was probably effected towards the latter end of the reign of Euthydemos, or during the early career of his son Demetrios.

The coins of Diodotos and Euthydemos are Greek money of the Attic standard. The Greek kings of Bactriana steadily adhered to the monetary system of Athens, which had already been adopted by Alexander and by his immediate successors in Syria. But the Greek kings of India, from the very first, departed from the Attic system in the mass of their copper money, as shown in the coins of Pantaleon and Agathokles, which are of the same weight, and of the same square shape, as the indigenous copper coins of Taxila. The copper money of Pantaleon's successors is usually square or rectangular, but the only square silver pieces are hemidrachms of Apollodotos and Philoxenos.

- The first coin to exhibit legends in both the Greek and the Kharoṣṭhi scripts, is a square copper coin of Demetrios. There is a good specimen in this Collection. Demetrios is known as the first king of Bactria and of India, that is to say, he held sway both in Bactria proper, and also in Gandhāra and the regions on the side of India where Kharoṣṭhi was used. Eukratides struck coins of the purely Greek type and weight, and also of the bilingual Indian type, in silver and in copper, while both types are found in silver only of Heliokles and of Antialkidas. The succeeding princes coined bilingual money alone in silver and copper. In the absence of money of the Greek type, it may be assumed that their power was confined to the regions about the North-West Indian frontier. Gold coins of the Greek standard till the time of Eukratides are known, though very scarce. The discovery of a twenty-stater piece of Eukratides at Bukhara caused a sensation in the numismatic world about sixty years ago. The medal itself is in the Cabinet de France, Bibliothèque Nationale, Paris. It is a remarkable fact that after Eukratides a gold currency of any Greek prince up to and including the last king Hermaios is absolutely unknown.¹ We are told that Persian darics and Roman *aurei* found their way to India in great quantities, but no darics were struck in Persia after 330 B.C., and gold was not coined at Rome in any quantity before the early Empire.

There is nothing to guide us to the history of the successors of Eukratides except their coins. It is conjectured that after his death

¹ There is a gold stater in the British Museum Collection which has been tentatively assigned to Menander. The obverse design is the helmeted bust of a king, and that on the reverse side is a standing owl; there are no inscriptions. The figure of the owl is of very inferior artistic merit, and cannot bear comparison with that on the owl hemidrachm of Menander. In the absence of any legend I do not think that any definite attribution can be made. The coin may be a contemporaneous imitation.

the empire of the Bactrian Greeks crumbled to pieces, that various scions of the royal house succeeded to different governorships, and that the Indian province became separate from Bactria proper. Cunningham held that only one hundred and twenty years elapsed from the revolt of Diodotos to the Indo-Scythian conquest of Kabul and Western India, and in that case we have to fit the reigns of some thirty-seven Greek kings and satraps into this short space of time. It follows that more than one of these rulers must have been reigning at the same period, and it is possible that the latter ones occupied positions in the mountains of Hazāra, Kashmīr, and Kāngra, analogous with those of the present Hill Rajahs. Two of the Greek kings appear to have been of importance, Apollodotos and Menander. They are both mentioned by name in ancient history, and their coins are found in comparative abundance over a great extent of country. They are almost as common in the North-West Panjab as in the Kabul Valley, and many specimens have been found to the east of the Satlaj, and even in the United Provinces.

The progressive degradation of the Greek lettering and design enables us roughly to classify these coins, and this conjectural succession of reigns can be checked by a close study of the monetary type and fabric. Thus joint as well as separate coins of Lysias and Antialkidas are known, which fact argues a very close relationship between these rulers, and successive reigns. From a tetradrachm of Eukratides we know that his father and mother were called Heliokles and Laodike. Then coins are known presenting conjugate busts of Strato and Agathokleia, and of Hermaios and Kalliope. One group of princes is distinguished by devotion to the deity Herakles, whose image is found on the coins of Euthydemos and of his son Demetrios among the Bactrian kings, and on those of Strato, Lysias, Theophilos, and Zoilos, amongst the Indian kings. The worship of Athene Promachos is characteristic of another group, and the figure of the goddess occurs on the coins of Strato, Menander, Epander, Dionysios, and Apollophanes. But probably the locality where the coin was struck would determine the god to whom it would be dedicated. It is common for the coins of some one ruler to bear the images of more than one deity. The well-executed Herakles hemidrachms of Zoilos are quite different in style from his poor coins on which the figure of Athene is found, and bear different monograms. Some moneyers were partial to the use of the purely Indian types of the elephant and humped bull, which are found together on the coins of Heliokles, and Apollodotos, and singly on many other pieces.

The fact that we have hemidrachms of Apollodotos bearing the elephant and humped bull, and that again other hemidrachms are

known of the Athene type on which the king is called Apollodotos Philopator, has led to the creation of two kings, Apollodotos I, and his supposed son Apollodotos II. Dr. Gardner—*B. M. Cat.*—distinguished Apollodotos Soter from Apollodotos Philopator, and Professor E. J. Rapson is disposed to accept this view, but I, like Mr. Vincent Smith, have combined the coins under one king of the name.

Since Cunningham wrote his book on Alexander's Successors in the East, the coins of two new kings—Peukolaos and Polyxenos—have been found. Only two pieces of Polyxenos are yet known, one in silver and the other in copper, and both are in this Collection. Mr. Rapson doubts their authenticity, but I think they are genuine, and Mr. J. Allan is inclined to support my view. There is no reason to suppose that the list of kings is yet complete.

From such considerations as those described above, worked out entirely from the study of the coins, it is possible to reconstruct the probable succession and mutual relationships of these Greek rulers, and to estimate the extent of country over which they ruled. The only coin of the entire series which bears what may be a recognisable date, is the unique tetradrachm of Plato in the British Museum.

Coins of Hermaios presenting his name alone are abundant in copper and fairly common in silver. There is the striking hemidrachm which exhibits the conjugate busts of Hermaios and his consort Kalliope, and a third class of coin also bears two names, that of Hermaios in the Greek legend, and of one Kujula Kadphises on the Kharoṣṭhi side. This joint appearance of the names of a Greek and of a barbaric ruler on the same coin, offers a convincing proof that Hermaios was the last of the Greek princes, and that Kujula Kadphises, of the Kushān race, was the leader who subverted the Greek dominion in India. A definite proof of this conclusion lies in the fact that the name of Hermaios finally disappears from the coinage, and its place in the Greek legend is taken by that of his conqueror, without any further alteration of the type.

There is no reason to suppose that Alexander struck money in India of the types current elsewhere. Von Sallet published a copper coin of Alexander as a piece of Indian origin, because its shape was more square than round, but I am informed that this theory has been abandoned. On the other hand, ancient imitations of the well-known silver currency of Athens are found on the Indian Frontier, on which the owl is replaced by a standing eagle with its head turned over one shoulder. In the British Museum there are two tetradrachms which bear the name of Alexander and this same eagle device, and these were probably struck in or near India.

One specimen is illustrated among the coins supplementary to this Section.

The Collection now catalogued is fine and up to date, and contains many rarities. It is weakest in the coins of the Bactrian kings, but the deficiencies are not great. The issues of the Greek princes of India are very well represented indeed. Attention is directed to the fine silver coins of Hippostratos, nearly all of which came from the Bleazby Collection. Notable pieces are the unique club coin of Theophilos, the copper coins of Telephos, the unique coins of Polyxenos, the silver pieces of Epander, Artemidoros, Nikias, and Apollophanes, and others. Several of these appear in a catalogue for the first time. The pieces of Andragoras, described in the *British Museum Catalogue*, do not properly belong to the Bactrian series, so the only coinages unrepresented here are those of Sophytes and Plato. Issues of these rulers, and the coin of Eukratides bearing the names of his parents, Heliokles and Laodike, which is also absent from the Museum, are illustrated in the Supplementary Plate.

A rigid exclusion of forgeries and doubtful coins has led to the rejection of a large number of specimens. The great extent to which Greek Bactrian coins are forged is well known. Fortunately for the collector, the forger as a rule confines his energies to making casts of known specimens, especially of Bactrian tetradrachms and Indian didrachms. On the other hand, I have seen several good die-struck imitations, especially of the tetradrachms of Antimachos Theos, and of those medallions of Agathokles which bear the portrait of Diodotos Soter. Nearly all the very rare copper coins are forged, especially the scarce copper types of Menander. In the Supplementary Lists I have made brief indications in the cases of those coins which are extensively imitated.

¹ I have not attempted to discriminate between Diodotos I and the younger Diodotos of Justin.

² A flattish coin, but I think it is genuine.

Metal No.	Obverse	Reverse
Æ 3	As on No. 2. W. 57. S. .7.	As on No. 2, but rubbed; details are indistinct.
	(γ) <i>Type: head of king wearing flat cap and Pallas; copper, round</i>	
Æ 4 ¹	In dotted circle, head of king to r., wearing flat Macedonian cap (kausia). W. 169. S. .85.	In dotted circle, Pallas facing, spear in r. hand, and buckler resting on the ground in l. Apparently no monogram. To r. ΒΑΣΙΛΕΩΣ To l. ΔΙΟΔΟΤΟΥ Pl. I.
5	" W. 125. S. .75.	" (poor) G. B.
	Unrepresented types:	
	(i) Diademed bust of king to r. B. M. Tetradrachm.	As on No. 2, but To r. ΔΙΟΔΟΤΟΥ To l. ΣΩΤΗΡΟΣ M. 4.
	(ii) B. M. Cat., Pl. I. 9.	Artemis to r. with torch; on one specimen she is accompanied by a dog.
	EUTHYDEMOS I ²	
	King of Bactria, circ. 220 B.C.	
	(α) <i>Type: head of king and seated Herakles with club on rock; silver, round</i>	
Æ 6 ³	Head of king r., diademed. W. 60. S. .65. The tetradrachm is not represented here.	In dotted circle, naked Herakles with club in his r. hand seated to l. on rocks; head of club rests on stone in front of him. To r. ΒΑΣΙΛΕΩΣ To l. ΕΥΘΥΔΗΜΟΥ In ex., M. 2. G. B. Pl. I.

¹ A very rare type; cf. White King, *Sale Catalogue*, No. 7.² For convenience I have adhered to the old classification of the *B. M. Cat.*, though there seems to be no good reason for the existence of a second Euthydemus. Mr. Vincent Smith has amalgamated all the coins under one king of the name.³ It has been noticed that the coins of Sophytes and the gold and silver coins of the early

Metal No.	Obverse	Reverse
Æ 7	As on No. 6. W. 30. S. .55.	As on No. 6.
	(β) <i>Type: head of king and seated Herakles with club on knee; silver, round</i>	
8	Head of king r., diademed. [Elderly portrait, cp. <i>B.M.Cat.</i> , Pl. II. 5.] W. 256. S. 1.1.	Herakles with club as before, seated l. on rock, over which lion's skin has been thrown; club rest- ing on his r. knee. To r. ΒΑΣΙΛΕΩΣ To l. ΕΥΘΥΔΗΜΟΥ R. M. 3. G. B. Pl. I.
9	” W. 240. S. 1.	” M. 3. G. B.
10 ¹	” W. 145. S. 1.	” Monogram indistinct.
11	” W. 173. S. 1.	As on No. 10.
12	” W. 92. S. .95.	”

Seleukids were struck in such a way that the obverse and reverse designs are placed in exactly opposite directions. This is also true of the coins of Diodotos and of the early Bactrian staters. It holds good with most of the coins of this type of Euthydemus, while on those of type (β) the two designs generally point the same way. Hence it is fair to assume that type (α) is earlier than type (β). On all the gold and silver Bactrian coins, the designs are carefully struck so as to point either in opposite directions, as on the earliest types, or in the same direction. I understand that as a rule the European Greek coins were struck haphazard as far as the comparative orientation of the obverse and reverse designs was concerned.

¹ Coins Nos. 12 to 16 appear to be contemporaneous or early imitations.

64	In astragalos border, diademed bust of king to r., wearing crested helmet adorned with ear and horn of bull. W. 258. S. 1.3.	Mounted Dioskouroi, as on No. 61. Above, ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ Below, ΕΥΚΡΑΤΙΔΟΥ R. M. 11. G. B. Pl. II.
65	” W. 244. S. 1.3.	M. 11. ”

¹ I regard this as a corroded, genuine specimen.

² This is what Cunningham calls the common type of the tetradrachms of Eukratides. Apparently in his day Bactrian tetradrachms were frequently brought down into India, but they are all now extremely rare, with the exception of the tetradrachms of Euthydemus I. Perhaps the coins which used to come from Bukhara to India now go up to Russia. But I have not been able to test this theory by a visit to St. Petersburg.

¹ Sir Alexander Cunningham read the reverse legend to mean 'The god of the city of Karisi'—see *Coins of Alexander's Successors in the East*, p. 169. The correct reading, *Kaviṣiye nagara devata*, 'the city-deity of Kapiśa', was first given by J. Marquart, *Ērānšahr*, pp. 280-281, and its importance was emphasised by Professor Rapson in *J. R. A. S.*, 1905, pp. 783-786. Kapiśa was the capital of Gandhāra.

XXXI. 2.</p>		
<h3>ANTIALKIDAS</h3> <p>King of the N.W. Frontier and Taxila</p> <p>(a) <i>Type: king wearing flat kausia, and enthroned Zeus Nikephoros; silver, round</i></p>		
Æ 167	Diademed bust of king to r., wearing flat kausia; Greek legend, above, ΒΑΣΙΛΕΩΣ ΝΙΚΗΦΟΡΟΥ; below, ANTIAALKIDΟΥ. W. 35. S. .65.	Zeus seated l. on throne; in l. hand long sceptre, which rests over l. shoulder; on outstretched r. hand he bears Nike, holding palm, but her wreath has just been snatched away from her by an elephant retiring to l. in l. field; in r. field M. 30. Kharoṣṭhi legend, above, <i>Maharajasa jayadharasa</i> ; below, <i>Antialikitasa</i> . G. B.
168	„ W. 37. S. .7.	As on No. 167, but elephant is just raising its trunk for the wreath which Nike is still holding out. G. B.
169-171	„ W. 36.	„ Pl. III.

Metal No.	Obverse	Reverse
Æ 172 ¹	As on No. 167, but instead of ΒΑΣΙΛΕΩΣ is ΒΑCΙΑΕΩC. W. 34.	As on No. 168; in r. field M. 35. G. B. Pl. III.
173	As on No. 167. W. 35.	As on No. 168; same monogram.
174 175	W. 34-37. " S. 65.	As on No. 167; under throne M. 34.
176 177	W. 37. "	G. B. "
178	W. 35. " S. 7.	As on No. 174," but M. 28. G. B.
179-183	W. 33-37. " S. 65.	"
(β) <i>Type: as (α), but king is helmeted; silver, round</i>		
184	Diademed bust of king to r., wearing crested helmet. Greek legend as on No. 167. W. 35. S. 75.	As on No. 167, with same Kh. legend, but elephant with bell round its neck is advancing to r. to take the wreath from Nike; under throne M. 32.
185	W. 36. "	G. B. "
186	W. 39. " S. 65.	As on No. 184, but elephant facing and reaching up its trunk; in r. field M. 30.

¹ The late forms of the letters Σ and Ω are remarkable occurring so early. They are also found on the extremely rare elephant type of the copper coins of Antialkidas—see No. 212. I do not know of any other examples in this series prior to the well-known copper coins of Nikias. The monogram is also unusual.

Metal No.	Obverse	Reverse
Æ 187	As on No. 186. W. 39.	As on No. 186. G. B.
188	” W. 36. S. 7.	”

192	” W. 36. S. 6.	As on No. 190, but elephant is retiring to l., and has just captured wreath; under throne M. 34. Pl. III.
(δ) <i>Type: Zeus and piloi and palms of Dioskouroi; copper, round</i>		
Æ 193 ¹	Undraped bust of Zeus to r., hurling thunderbolt with r. hand; Greek legend, above, ΒΑΣΙΛΕΩΣ ΝΙΚΗΦΟΡΟΥ; below, ΑΝΤΙΑΛ ΚΙΔΟΥ. W. 115. S. 1.	Laureated piloi, and palms of the Dioskouroi; Kh. legend, above, <i>Maharajasa jayadharasa</i> ; below, <i>Antialikitasa</i> . To r. in ex. M. 32. G. B. Pl. IV.
194	” W. 51. S. 9.	”

¹ The round copper coins of Antialkidas are uncommon, and those of Lysias extremely rare. I only know of three specimens of the latter, two in the British Museum, and one in the Indian Museum. It is to be noted that these round issues all bear the same monogram, M. 32. They are probably earlier than the square coins.

Unrepresented types: None.		

¹ This remarkable coin belonged to Mr. Bleazby, and was formerly in the White King Collection. It and No. 372 (a copper coin) are the only testimony to the existence of a king named Polyxenos. The silver coin came to light about sixteen years ago, but its authenticity was doubted by Professor E. J. Rapson—see p. 6 of Mr. Vincent Smith's Introduction to Vol. I of the *I. M. Cat.* In my opinion it is a genuine coin. The copper coin was discovered after the hemidrachm, and was also once in the White King Collection. Both coins are still unique, though I have seen one or two casts of the hemidrachm. I have not

yet come across any reproductions of the copper piece. The hemidrachm helps us to place this new ruler. It is very similar to a common issue of Strato I. The copper coin is different, the reverse design being like that on the copper coins of Antimachos Nikephoros. But the titles ΕΠΙΦΑΝΗΣ ΣΩΤΗΡ, exhibited by the silver hemidrachm, are again used. Both coins bear monograms often found on the coins of Strato. I should be inclined to consider Polyxenos a close relation, and the successor of Strato, in all, or part of the latter king's dominions. His reign can have had only a brief duration.

¹ One or two extremely rare copper coins of Menander of the panther type—see No. 515—are known on which the king is entitled ΔΙΚΑΙΟΣ. Two silver ΔΙΚΑΙΟΣ coins were in the White King Collection, *Sale Catalogue*, Part I, Nos. 964 and 965. This specimen has come from it to the Lahore Museum via the Bleasby Cabinet. The second coin was of a different type, the bust of the king on the obverse side being helmeted, and the reverse design is that of a mounted horseman. There are two silver ΔΙΚΑΙΟΣ coins in the British Museum of a third type, the reverse design being the conventional figure of Nike. On all four silver coins the bust is that of an aged man, so it would appear that towards the end of his long reign the title of Menander on the coinage was altered from ΣΩΤΗΡ to ΔΙΚΑΙΟΣ.

Attention is drawn to the reverse design of this coin as conceived by the oriental Greek die-cutter. The figure is winged, and bears a wreath and palm, so must be meant for Nike. But, on the other hand, the deity is dressed like Artemis, and wears the cap peculiar to the Dioskouroi. The head is surrounded by what looks like a halo, but is more probably intended to represent a veil floating round the head—compare the figure of Artemis on a copper coin of Maues, *B. M. Cat.*, Pl. XVI. 4.

¹ There is a good specimen of this coin in the British Museum Collection, but on that the panther is turned to the right. Another type of panther ΔΙΚΑΙΟΣ copper coin has Pallas on the obverse—see Cunningham's *Coins of Alexander's Successors in the East*, Pl. XII. 14. This coin is also in the British Museum.

¹ A hemidrachm of Telephos was discovered about the year 1841, and for many years the existence of this Indo-Graecian king remained known from this one specimen. Two more are now in the Berlin Museum, and were published in Von Sallet's monograph *Die Nachfolger Alexander des Grossen in Indien*. Recently one or two copper coins of Telephos of two different types have come to light. Type (ii) was published by Mr. Vincent Smith in 'Numismatic Notes and Novelties', Part III, *J.A.S.B.*, 1898. I published type (α) in N. S. XIV, from a good specimen in my own Cabinet. Since this latter publication I have

acquired the two additional specimens of this second type which are now in the Lahore Museum.

Of the hemidrachm Sir Alexander Cunningham remarked that its strange types offer nothing whatever to guide us in assigning Telephos a position either in time or place, and that its single monogram is not found on the coins of any other Greek prince. He surmised that Telephos may have ruled either in Peshawar or in the North-West Punjab for a few months just prior to the reign of Hermaios.

The monogram on the hemidrachms of Telephos is not only common to them and to his copper coins of type (a), but is also found on the biga type of the silver coins of the Indo-Scythic ruler Maues (Moa), and on a copper coin of Maues. Copper coin type (ii) bears a monogram $\frac{A}{T}$ which is only found elsewhere on square copper coins of Maues. As regards

design, the crouching figure on type (ii) is unique in the entire Indo-Greek series, but the walking figure on the reverse of type (a) somewhat resembles that on the hemidrachm of Agathokleia. The obverse copper coin design is similar to the reverse design of the silver coins of Hermaios, and to that of the Maues silver pieces of the biga type.

We are then to look for kinship in time and place with Maues, and this agrees very well with Cunningham's tentative conclusions.

¹ This coin is in extremely poor condition, but I have inserted the legends and mint-mark from a fairly good specimen in the British Museum. A copper coin of Peukolaos was published by Mr. Vincent Smith in 'Numismatic Notes and Novelties', Part III, *J.A.S.B.*, 1898.

¹ These coins were attributed by Cunningham to a Strato II, son of Strato I, but Professor E. J. Rapson has shown that:

(i) The coins bear the joint names of Strato Soter and Strato Philopator, who may be termed Strato I and Strato II, the Strato I being identical with the Strato already known from his coins;

(ii) Strato Philopator (Strato II) is not the son but is the grandson of Strato Soter (Strato I);

(iii) the aged bust on the coins must be that of the first Strato.
The full Kharosthi inscription on the type of coin No. 643 is

Maharajasa tratarasa Stratasa, potrasa asa priyapita Stratasa.

‘(The coin) of King Strato Soter, and of his grandson Strato Philopator.’

These conclusions are contained in a paper ‘Coins of the Graeco-Indian Sovereigns Agathocleia, Strato I Soter, and Strato II Philopator’, *Corolla Numismatica*, Oxford, 1906.

SECTION II

COINS OF THE INDO-SCYTHIANS AND INDO-PARTHIANS

INTRODUCTION

THE first Section of this work has treated of the coins of the Greek invaders of North-West India. We now come to the next in chronological order of the foreign lines which are known to us chiefly through their coins, the so-called Indo-Scythian and Indo-Parthian dynasties. The Indo-Scythian, Kushān, and White Hun invasions mark the subjection of the extreme North-West of India to tribes which came from regions of Central Asia. Apart from the coins and the scanty inscriptions, the only information we can glean as to the Indo-Scythians and their immediate successors, is to be found in the *Rājatarāṅginī*,¹ the Sanskrit metrical chronicle of Kashmir, in the official annals of the Chinese dynasties, and in the records of those Chinese pilgrims who visited the sacred Buddhist sites in Northern India.

According to Chinese accounts, the Sākas—Se or Sok—a nomad horde living to the west of the Chinese Empire, were driven out of their lands by another nomad horde, the Yue-chi, and migrating into Ki-pin (Kashmir) about the end of the second century B.C., spread over a region which roughly corresponded with the present provinces of Sistan, Sind, and the North-West Panjab. They overthrew the Greek power in these parts, and established a new kingdom east and west of the River Indus which is known as Indo-Scythia. The Greeks of Kabul probably maintained their independence. According to Cunningham, there were three distinct dynasties of Sāka or Indo-Scythian rulers whose names have been preserved to us on their coins: one proceeding from Vonones and his lieutenants Spalahores and Spalagadames, holding to the west of the Indus; a second from Maues or Moa, and Azes, in the Panjab; and a third in Sind and Western Central India, to which the great satrap Nahapana belonged. The coins of the three prominent kings Maues, Azes, and Azilises, are found chiefly in the Panjab, and rarely in Afghanistan. These three rulers certainly preceded the Kushān conqueror Kujula Kadphises, with whom they seem to have had nothing in common, whereas

¹ Translated by Sir Aurel Stein.

their connexion with the Sāka dynasty of Vonones is undoubted, as joint coins of Azes and Spaliriśes are known, and Spaliriśes was a member of the Vonones dynasty.

The name of Vonones is found in the Greek coin legends in the form ONΩNOY, and the corresponding Kharoṣṭhi legends contain the names of two of his relatives, Spalahora (Spalahores) and Spalagadama (Spalagadames). That the latter were subordinate to Vonones is certain from the fact that the name and titles of Vonones are given in the Greek script as ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓΑΛΟΥ ΟΝΩΝΟΥ, while Spalahora is merely called brother of the king, and Spalagadama is the son of Spalahora. On a square copper coin the Greek form of *Spalahorasa* is given as ΣΠΑΛΥΡΙΟΣ, the presumed nominative of which is ΣΠΑΛΥΡΙΣ. We also possess similar coins struck by one Spaliriśa (Spaliriśes) as 'brother of the king', with a Greek legend ΒΑΣΙΛΕΩΣ ΑΔΕΛΦΟΥ ΣΠΑΛΙΡΙΣΟΥ, translated into the Kharoṣṭhi as *Maharajabhratu dhramiśa Spaliriśasa*, '[coin] of the pious Spaliriśa, brother of the king'. Again, other coins exhibit Spaliriśa as king on his own account with the usual Greek suzerain titles. The king referred to in the first of these two types of Spaliriśa, can hardly be any other than Vonones, and the legitimate inferences seem to be that Spaliriśa was another brother of Vonones, who survived both Spalahora and Vonones, and succeeded the latter on the throne.

Two types of coin, one silver and the other copper, exhibit the Greek legend ΒΑΣΙΛΕΩΣ ΜΕΓΑΛΟΥ ΣΠΑΛΙΡΙΣΟΥ, and the Kharoṣṭhi legend *Maharajasa mahatakasa Ayasa*. It follows that Spaliriśa employed a presumed relative named Aya as his representative or viceroy. All the above coins belong exclusively to Sistan and the regions west of the Indus, and cease abruptly with the vice-regal coinage of Aya.

But coins bearing the name of Aya, and a Greek inscription ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓΑΛΟΥ ΑΖΟΥ, which are obviously very closely related to the issues of the Vonones family, are found in great abundance in the Panjab, and scarcely at all in Sistan (Drangiana) and Qandahar (Arachosia). The tacit assumption has always been made that Azes, the king of the Western Panjab, is identical with Azes, the Arachosian viceroy of Spaliriśa. But the coins of Maues, though related to those of Azes, are earlier and better in style, and Maues was certainly a suzerain king in the Western Panjab. So it is generally held that Azes succeeded Maues, and about the same period must have relinquished his rights in regions west of the Indus.

These conclusions, as set out by Mr. Vincent Smith in his paper, 'The Indo-Parthian Dynasties', *Zeitschrift der Deutschen Morgen-*

ländischen Gesellschaft, Leipzig, 1906, are direct interpretations of the coin inscriptions. He rightly shows that a coin described by Edward Thomas and Cunningham as a joint type of Vonones and Azes, is really a coin of Maues, and so the supposed connexion between Vonones and Azes disappears. But there are joint types, both in silver and copper, of Azes and Azilises. Azes struck one or two scarce coins bearing his own name in Greek on the obverse, and that of Azilises in Kharoṣṭhi on the reverse. The legends are ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓΑΛΟΥ ΑΖΟΥ, and *Maharajasa rajarajasa mahatasa Ayiliṣasa*. Then again we have a very scarce joint type with exactly similar inscriptions to those just chronicled, but the name in Greek is ΑΖΙΑΙΣΟΥ, and in Kharoṣṭhi is *Ayasa*. Mr. Vincent Smith postulates that these two joint types, when considered together, prove that Azilises, before his accession to independent power, was the subordinate viceregal colleague of an Azes, and that an Azes, similarly, was subsequently the subordinate viceregal colleague of Azilises. The two princes named Azes cannot be identical, and they must be distinguished as Azes I and Azes II. Mr. Vincent Smith holds that this necessary inference is fully confirmed by minute examination of the immense mass of coins bearing the name of Azes alone, which readily fall into two classes—one well executed, with good Greek legends, the other semi-barbarous, with debased, and often corrupt, Greek inscriptions. He concludes that Azes II was the grandson of Azes I, and son of Azilises, who undoubtedly succeeded Azes I.

Whether this evidence by itself is weighty enough to warrant so important a conclusion, is a matter of opinion. I know it is generally held that Azes came before Azilises, but the coins are so far our only testimony, and the silver coins of Azilises are better executed and earlier in style than those of Azes. The best didrachms of Azes compare unfavourably with the fine silver coins of Azilises with Zeus obverse, and Dioskouroi reverse, and with other rare silver types of Azilises. If Azilises preceded Azes, then, following Mr. Vincent Smith, we must have Azilises I and Azilises II, instead of Azes I and Azes II. The differences in type and style between the abundant issues of Azes can be adequately explained by reasons of locality alone, operating through a long reign.

The dynasties of Maues and Vonones coined extensively in silver and copper, but like the Indo-Greek princes, they did not strike gold. A possible exception to this last statement is the unique gold piece in this Collection which bears the name *Athama*, and is certainly of either Indo-Scythian or Indo-Parthian fabric. No inscription containing the names of Maues or Vonones, or of their immediate successors, has yet been found, but the coins prove that Azes must have employed in his

administration Indian servants such as the general Aspavarma, son of Indravarma. The name of Aspavarma also occurs on coins represented in this Collection, which I have shown are probably to be attributed to Gondophares, thus providing a link between the Indo-Scythian and Indo-Parthian dynasties.

Cunningham makes Gondophares the founder of a separate dynasty in succession to that of Maues, Azes, and Azilises. Abdagases was his nephew, and other members of the line were Orthagnes, Pakores, and Sanabares. The names of these kings are Parthian, and the busts on their coins closely resemble those of the contemporaneous rulers of Parthia. The planetary symbol, ♄, is generally found on the coins of Gondophares and Abdagases, and was termed by Cunningham the Gondopharian symbol.

The name of Gondophares occurs in the Christian tradition connected with the Apostle Thomas. '*The Acts of Thomas* contain certain statements which discoveries made in recent years have enabled us to test in the light of actual history. The narrative tells us that the Apostle Thomas, much against his will and inclination, had to undertake the work of preaching the Gospel to the Indians; and that to induce him to obey the mandate he had received, our Lord appeared to him in person, and sold him to Habbān, a minister of King Gondophares of the Indians, who had been sent to Syria in search of a competent builder, able to undertake the construction of a palace for his sovereign. Thomas in his company left by sea for India, which was reached after a rapid passage. Both proceeded to the Court, where Thomas was presented to the king, and undertook the erection of the building' (*India and the Apostle Thomas*, by A. E. Medlycott). It is stated that Thomas made many converts, including Gondophares himself and his brother Gad, and ultimately met a martyr's death.

The name of Gondophares, in the Kharoṣṭhi *Guduphara* or possibly *Gandapharna*, is found in various texts and versions of these Apocryphal Acts of Thomas, as Gudnaphar, Goundaphoros, Gundaforus, and Gundoforus. It is a remarkable fact that after the lapse of so many centuries, the actual existence of this king has been proved by the discovery of his coins in India. The first specimen was found by Masson in Afghanistan about the year 1834, and since then many have come to light. Their find-spots show that this ruler must have held Kabul, Qandahar, Sistan, and the West and South Panjab. His reign probably lasted thirty or forty years, and covered the middle of the first century A.D. The name of Gondophares occurs in an inscription on the well-known Takht-i-Bahi stone, now in the Lahore Museum.

The name of Gad, mentioned by tradition as the brother of Gondophares, possibly occurs in the Kharoṣṭhi legend on the coins of Orthagnes. A reference is invited to the footnote on this point in the body of the Catalogue.

Subordinate members of this dynasty are the satraps Zeionises, son of Manigul, Kharahostes, son of Artā, and Arsakes Theos. Probably the last king of the line was an anonymous ruler who is known on his coins merely by his titles of the King of Kings, the Great Saviour. His currency is found in copper only, and is extremely common all over the Panjab, as well as in Qandahar and in the Kabul Valley. All the coins without exception bear a three-pronged symbol, , which was evidently the peculiar device of this prince, but there is a total absence of Greek monograms. Certain issues bear the single Kharoṣṭhi *akṣara vi* in the field. The rule of this nameless king must have been both long and extensive. Why he should have remained anonymous is still a puzzle, though many investigators have attempted a solution of the mystery.

In the above account of Vonones, Maues, and their successors, I have followed Cunningham. A modern view is expressed in Mr. Vincent A. Smith's article, 'The Indo-Parthian Dynasties', to which I have already alluded in this Introduction. Mr. Vincent Smith holds that the key to these problems is obtainable from the history of Parthia. Remarking on the square copper coin of Maues with horse obverse and bow-case reverse, Von Sallet observed in his *Nachfolger Alexanders des Grossen* that 'this fine coin is remarkable on account of the completely Arsakidan types, which occur especially on the reverses of the copper money of Arsakes VI (Mithradates I), and were exactly copied by the hitherto imperfectly known Arsakes Theos of Bactria. Without indulging in further conjectures, we must maintain that both these pieces indicate an Arsakidan rather than an Indo-Scythian origin for Maues.' Mr. Vincent Smith quotes this observation, and holds that Maues was a Parthian chieftain who, about 120 B.C., during the troubles which ensued upon the death of Mithradates I, made himself king of the Western Panjab, which seems to have formed an integral part of the Parthian dominions for a few years. Vonones was another Parthian chief who about the same time became king of Sistan and the Indian borderland. There is no adequate justification for describing the coins of Azes, Vonones, and the rest as coins of the Sākas. According to this view the terms Indo-Scythian and Sāka disappear, and the dynasties under discussion become simply Indo-Parthian.

I have already stated that the invasion of these Sāka, or Parthian, chiefs preceded that of the Kushān leader, Kujula Kadphises, who

swept away the last remnants of Greek authority as represented by Hermaios, and annexed Kabul to the growing Kushān empire about the year A.D. 50. Thus the Sāka dominion overlapped that of the Greeks, and it is supposed that some of the later Greek princes were driven out of the Panjab into the mountains, Artemidoros perhaps to Kashmir, and Dionysios, Zoilos, and the second Strato to Kangra. Late in the first century A.D., all the minor states of the Panjab, both Greek and Parthian, were absorbed by the second Kadphises into the Kushān monarchy.

With the exceptions that Gondophares is mentioned in a single inscription and in a well-known early Christian tradition, both of which have been already touched upon, coins are our sole source of direct knowledge of the Indo-Scythic and Indo-Parthian dynasties. Of the rulers called Indo-Parthian in this Catalogue, I suppose the only ones of undoubted Parthian lineage are Gondophares, Abdagases, Orthagnes, Sanabares, Pakores, and Arsakes Theos. I can only say of the others that perhaps they fall more naturally into this Section than into the third Section. Zeionises and Kharahostes may have been satraps of Taxila, and Rajāvula was probably of Sāka descent. Heraos has been called a Sāka, and a Kushān, and the types of the coins of Soter Megas ally him both to the Kushāns and to the Indo-Parthians. Hyrkodes, Phseigacharis, and Sapaleizes are nondescripts. The subject is a difficult one, and the correct and full solution of all the problems involved must await the discovery of adequate epigraphical evidence.

For further information on this period I can refer the reader to the publications already mentioned in this Introduction, and in the Introduction to the first Section, and to the following:

Dr. J. Marquart, *Ērānšahr*. Berlin, 1901.

V. A. Smith, 'The Kushān or Indo-Scythian Period of Indian History', *J. R. A. S.*, 1903.

R. D. Banerji, 'The Scythian Period of Indian History', *Indian Antiquary*, 1908.

There are Dr. Fleet's 'Moga, Maues, and Vonones', *J. R. A. S.*, 1907, and other papers by the same authority, and introductory remarks in the papers, 'White Huns and Kindred Tribes in the History of the Indian North-West Frontier', by Sir Aurel Stein, *Indian Antiquary*, 1905, and F. W. Thomas's, 'The Date of Kanishka', with subsequent contributions by other specialists on the same subject, *J. R. A. S.*, 1913.

The Lahore Museum Collection of Indo-Scythic and Indo-Parthian coins is very good, and the number of unrepresented types is quite small. It contains an unpublished, unique silver coin of Maues, and

a similar piece of Azilises. Attention is directed to the superb silver coins of Azilises, nearly all of which came from the Bleazby Collection. The rarer silver types of this king are known from coins which are either unique, or at the most not more than two or three in number. All the silver types are shown here. The issues of Azes are excellently represented; there is the rare coin of Spalirises as the king's brother; and the gold piece bearing the name of Aṭhama, a coin which is unique of its kind.

As regards the Parthian series, there is a new and unpublished type of the satrap Kharahostes, and the coin which may contain the name of Soter Megas. This was published in my paper 'Two Coins of Soter Megas', *J. R. A. S.*, July, 1913. The Cabinet includes one or two specimens of the piece which I have attributed to Gondophares and Aspavarma. Apart from these coins there is nothing particularly noteworthy, but the Collection is thoroughly representative.

COINS OF THE INDO-SCYTHIANS

Metal No.	Obverse	Reverse
MAUES (MOA)		
<i>(a) Type: Zeus and Nike; silver, round</i>		
Æ 1	ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓΑΛΟΥ ΜΑΥΟΥ Zeus carrying long sceptre, standing to l. with r. arm outstretched. W. 135. S. 1.	<i>Rajatirajasa mahatasa Moasa.</i> Winged Nike to r. with wreath and palm. To r. M. 1. G. B. <div style="text-align: right;">Pl. X.</div>

¹ The name of Azes is found on the Greek side, the side of honour, but is absent from the Kharoṣṭhi side. There is instead an inscription to the effect that the coin is the issue of Aspavarma, son of Indravarma, the victorious general. Aspavarma was apparently an Indian general and subordinate ruler of the suzerain monarch Azes. A reference is invited to coins Nos. 35-37 of the coins of the Indo-Parthians in this Catalogue, which I have attributed to Aspavarma as the *strategos* of Gondopharnes.

¹ This coin is of the common type of the silver currency of Azilises and is also of a well-known silver type of Azes. The reverse design is that of a standing female figure with knotted hair. She does not wear a mural crown. Sir A. Cunningham remarks in his *Coins of the Sakas* that it is very doubtful for whom this female figure is intended. Professor H. H. Wilson calls her Victory, while Professor Gardner suggests a city (*B. M. Cat.*). Cunningham himself inclined to Demeter, or Tyche (Fortune). The object held on the outstretched right hand is regarded as uncertain by Cunningham and Gardner; Mr. Vincent Smith suggests a brazier with fire (*I. M. Cat.*, vol. i). A comparison with the gold coins of Huvishka on which the deity Pharro is depicted, e.g. *B. M. Cat.*, Pl. XXVIII. 26, will, I think, leave little doubt that the object is a representation of flames, possibly issuing from some such receptacle as a brazier, if not from the hand itself.

In connexion with the joint coinage of Azes and Azilises, I may mention the theory of G. Hoffmann—*Auszüge aus syrischen Akten persischer Märtyrer*, Leipzig, 1880, p. 142—that the names are the same, one being a contraction of the other. He apparently was led to this erroneous conclusion because he did not recognize the existence of what is really a joint type. Such types are well known in the Indo-Greek series, e.g. joint types of Lysias and Antialkidas, of Vonones and his relatives, and of Spalirises and Azes.

	(θ) <i>Type: mounted king and god and goddess; silver, round</i>	
334 ²	As on No. 320. To r. M. 38. W. 150. S. 1-1.	Kh. legend as on No. 320. God and goddess standing to front; male deity carries long sceptre in l. hand, and points to r. with outstretched r. arm. Goddess has diadem in r. hand and bears mural crown; cornucopiae on l. arm. To r. Kh. mon. <i>spila</i> . To l. Kh. <i>pa</i> . G. B. Pl. XIII.
335	W. 36. "	G. B. " Pl. XIII.

¹ This design of the *abhiseka* of Lakṣmī is well known in sculpture. It also occurs on an unpublished early Hindu cast coin in the Cabinet of the Hon'ble Mr. R. Burn, I.C.S., and on the coins of Jayagupta.

² According to Prof. Rapson, the male deity is Zeus. He conjectures that the goddess may perhaps be the tutelary deity of Puṣkalāvati (*Notes on Indian Coins and Seals*, Part VI).

¹ This coin was originally in the White King Collection, and is No. 269 of the *Sale Catalogue*. It is there described as an unpublished coin of Azes, and the deity is called Neptune. But it is undoubtedly a coin of Azilises of the type of the two larger coins which precede it here. These are good specimens, and show that the objects in the left hand of the deity, so far unelucidated, are tongs and hammer. The deity must therefore correspond with Hephaistos.

Unrepresented types: None.		

¹ The Kharoṣṭhi legend on this coin is identical with that on No. 382, while the Greek legend is a translation of the Kharoṣṭhi legend on No. 372. It is held that Spalyris is the Greek form of the Scythian-Persian name Spalahores, who was brother of a suzerain king Vonones. Spalagadames, the Greek form of whose name is not given to us, was son of Spalahores. He also struck coins under Vonones.

² The only known round specimen.

SPALIRISES WITH AZES

(iv) Didrachm of the hemidrachm type. B. M.		Pl. XV.
--	--	---------

¹ Special attention is drawn to this remarkable coin, which has been published by Prof. E. J. Rapson in Part VI of his *Notes on Indian Coins and Seals*. The name Athama is reasonably certain, and we can have no hesitation in recognizing him as a member of the dynasty of Azes and Azilises. The coin is unique of its kind. It is the only known specimen in gold of the Indo-Scythic series.

² This is a well-executed little coin, and must belong to either this or to the Indo-Parthian series, but differs in style from any coin I know. The epithet *jayatasa* is perfectly clear, and its presence shows that this specimen is quite a new type. The only coins in the entire Indo-Scythic and Indo-Parthian series known to me, which bear this epithet, are those of Aspavarma, but the presence of the word on this specimen ending in - - - *rayasa* differentiates it from both types of the Aspavarma coins. The only Kharoṣṭhi epithet on Indo-Greek coins ending in - - - *rayasa* is *maharayasa*, a variant of *maharajasa*, but on this coin the preceding *akṣara*, which is partly off the coin, does not look like *ha*.

COINS OF THE INDO-PARTHIANS

¹ Coins in mixed metal bearing the name of Gondophares with an additional name or epithet *Sasasa* on the Kharoṣṭhi side are quite common. Sir A. Cunningham called these the coins of Sasan—see his *Coins of the Sakas*. Prof. Gardner described them as coins of Gondophares with the inscription *Sasasa*, but did not further discuss the bearing of this name or title. Mr. Vincent Smith prefers to consider the word as a mere epithet, but cannot fix its meaning—*I. M. Cat.*, vol. i.

The coins themselves are our only evidence, and it is noteworthy that the word *Sasasa* occupies the place of honour, where the name of the king is almost always situated. In support of his contention that the word is a title, Mr. Vincent Smith instances the coins of Azes and Aspavarma on which this very place is occupied by the undoubted epithet *jayatasa*. But I think that if it can be shown that there was a name, the genitive form of which was *Sasasa*, the numismatic evidence must be interpreted in favour of Sir A. Cunningham's theory, and there is no doubt that such a name existed. Sāsān was the name of the father of Ardeshir, founder of the Sāsānian (Sassanian) dynasty. Then Justi in his *Iranisches Namenbuch* gives references to Σάσας, a common Scythian name. This same name Σάσας occurs in more than one Scythian inscription found in the neighbourhood of the Black Sea—see *Inscriptiones Antiquae Orae Septentrionalis Ponti Euxini*, by Basilius Latyschev, St. Petersburg, 1885.

Bi. 18	As on No. 8. Kh. <i>tr.</i> S. .8.	As on No. 8.
19	As on No. 8. W. 154. S. .75.	" Pl. XV.
(γ) Type: king on horseback and standing Zeus Nikephoros, with name Σασας; billon, round		
20 ¹	As on No. 8, but no monogram visible. W. 150. S. .8.	Zeus standing to l.; Nike on outstretched r. hand. Kh. legend <i>Maharajasa rajati-rajasa devavratasa Gudupharasa Sasasa.</i> To r. M. 3 and Kh. <i>va.</i> To l. M. 1. Pl. XV.
21	To r. Kh. <i>pa.</i> " S. .8.	"
22	S. .8. "	" but under monogram on l. is Kh. <i>akṣara ṭha.</i>
23 24	To r. Kh. <i>ma.</i> " S. .8.	"

¹ The full reading of the Kharoṣṭhi legend on this type is given by Cunningham as *Maharajasa rajatirajasa mahatasa dhramikasa Gudupharasa Sasasa*, but the specimen illustrated by him in the *Coins of the Sakas* does not help us, and the reading given may be only tentative. The full legend was not elucidated either by Gardner or Vincent Smith. From the fifteen specimens in this Collection, the reading *Maharajasa rajatirajasa - - - Gudupharasa Sasasa* is certain, but there is a difficulty about the word or words following *rajatirajasa*. This is also missing from all the British Museum specimens. As far as I can judge, the word is *devavratasa*, or possibly *sudevavratasa*.

¹ I have already published this type as a coin of Gondophares and Áspavarma—see N. S. XIV, § 82. I need not dwell on the differences between this coin and the known type of Azes and Áspavarma illustrated at Pl. XX. 2 of the *B. M. Cat.*, as they are so apparent. My reasons for attributing the coin to Áspavarma acting as the governor or satrap of Gondophares, although the name of Gondophares cannot be read in the illegible Greek inscription, are briefly these:

(i) The Kharoṣṭhi inscription resembles that on the coins of Azes and Áspavarma, but there is the additional epithet *tratarasa*. I invite attention to the unusual, if not unique, arrangement of the inscription.

(ii) The coin not only bears the planetary symbol used by Gondophares, but it agrees closely in design with a known type of Gondophares—see *I. M. Cat.*, Pl. IX. 9. Each piece has five monograms, and three of these are common to both coins.

Unrepresented types :		
(i) As type (a), but title of king's nephew in Greek. <i>B. M. Cat.</i> , Pl. XXIII. 3.		
(ii) As type (γ), but bust to l. <i>Cunningham</i> , Pl. XI. 4.		
ORTHAGNES		
(a) <i>Type: bust of king and Nike, with names of Gondophares and of Guda (Gad)</i> ¹ ; copper, round		
72	BACIAEYC BACIA - - - - - NHC Bust of king to l., diademed. W. 124. S. -9.	Winged Nike to r. with palm and wreath. Kh. legend - - - - - <i>Gudapharasagudana maharajasa</i> - - - To r. Kh. <i>go</i> . To l. Kh. <i>ja</i> . Pl. XVI.

¹ On p. 121 of his *Coins of the Sakas* Cunningham remarked that 'as the name of Orthagnes is written in Arian characters as *Gurdana* or *Gadana*, beginning with the letter G, it seems not improbable that he is the king's brother mentioned in the Legend of St. Thomas under the name of *Gad*'.

Corresponding to the Greek coin legend **BACIAEYC BACIAEΩN MEΓAC OPOAGNHC**, there is the Kharoṣṭhi inscription *Maharajasa rajatirajasa Gudupharasagudana*. The last word must signify some connexion with Gondophares, but Cunningham's alternative suggestion of *Gudupharasagarbha*, 'brother of Gondophares', cannot be read on the coins. If *Guda* is a name corresponding to the traditional Gad—Syriac and Latin, Gad; Greek, Γάδ—then the word under discussion ought to mean 'of Gondophares and of Gad'. But one word is in the genitive singular, and the other is in the genitive plural. On the other hand the word *Gudana* may be an epithet, or monetary denomination, or again it may, as suggested by Dr. J. F. Fleet, give us the name of the tribe of Gondophares. I am inclined to think it is a name. Cunningham published one specimen of the currency of Orthagnes where the name of Gondophares was absent from the Kharoṣṭhi legend, and its place was taken by the name-word *Gudranasa* (?)—see *Coins of the Sakas*, p. 163, No. 18. This piece is identical with *B. M. Cat.*, p. 109, No. 7. Another specimen is No. 75 in this Collection. Neither piece is in good condition. I read the Kharoṣṭhi inscription as - - - - *mahatasa Gudranasa*. There can be no doubt that this coin, apparently still unique, is quite different from the usual type of Orthagnes. Seven legible specimens of the latter which I have examined, give the following variants of the last part of the word *Gudupharasagudana*—*Gudana*, *Guda*, *Guda*, *Gudanasa*. But as far as I have seen, the first part remains invariable as *Gudupharasa*.

An intaglio recently acquired from the North-West Frontier Province, India, bears the Kharoṣṭhi word *Gadasa*, which name may also occur on a pedestal excavated at Palāṭh Dherī, Chārsada, N.W. Frontier Province—see the *Annual Report* of the Archaeological Survey of India for 1902-3.

Unrepresented types: None.		

¹ The recognition of the fact that the letter χ in the Greek form of Kharahostes is *h* and not *m* is due to Dr. Fleet; see *J.R.A.S.*, 1907, pp. 1043-4.

This discovery offers a convincing explanation both of the omission from the Kh. form of the name of any *akṣara* corresponding to *m*, and of the otherwise anomalous use of the initial form of the *akṣara o*.

The Greek word ΑΡΤΑΥΟΥ is not a compound; the two words ΑΡΤΑ and ΥΟΥ are both in the genitive singular.

² The Kharoṣṭhi legend shows that the satrap Kharahostes was son of one Arta. He has been identified with the Kharaōsta of the Mathurā Lion-Capital, but this identification was disputed by Bühler. The name of the satrap is preceded by the monosyllable *pra*, the meaning of which has not yet been elucidated. These points are discussed by Prof. E. J. Rapson in Part VI of *Notes on Indian Coins and Seals*.

³ This new and unpublished type was one of the unidentified coins in the Rodgers Collection. I think my attribution is certain because of the characteristic use of the initial form of the *akṣara o* in the Kharoṣṭhi inscription. I have seen two other specimens of this type.

¹ The only specimen of this rare type known to me in which monograms are absent from the obverse side. Coin No. 95 is a normal specimen.

² The coins of Soter Megas purport to be struck by an anonymous ruler calling himself the King of Kings, the Great Saviour. Are they to be reckoned a separate series issued anonymously by some king whose name is otherwise unknown to us, or are they the currency of a monarch whose name we know, possibly from other coins as well as from inscriptions? The coins are found in extraordinary abundance, and over a wide stretch of country extending from Peshāwar to Mathurā. These facts point to great power and a long reign, and

are much in favour of the supposition that we must look for Soter Megas amongst the most important of the kings and satraps known to us, as it is very improbable that such a great potentate would be nameless and unknown except from these coins. The style of the coins, which are in copper only, and the absence of square forms, point to a period about the Kushān conquest, so that Soter Megas was probably a contemporary of one of the two Kadphises.

As far as their inscriptions are concerned, the coins fall into three groups:—(i) with Greek legend only, translated as 'Of the King of Kings, the Great Saviour'; (ii) with the same Greek legend accompanied by its literal translation into Kharoṣṭhi; and (iii) without any inscription. All are distinguished by the presence of a three-pronged symbol $\frac{4}{5}$ peculiar to the striker, which may be called the symbol of Soter Megas, while certain types almost invariably exhibit in the field the Kharoṣṭhi *akṣara* vi. Cunningham suggested that this may possibly be the initial of the king's name, but there is no ground for such a hypothesis. He remarked that the want of monograms distinguishes the coins of the Nameless King from those of the Indo-Scythian and Indo-Parthian dynasties, and would seem to connect him with the Kushāns. On the other hand, the horseman is the favourite type of the Saka kings—Sir A. Cunningham's *Coins of the Sakas*.

It is possible that these coins were struck by more than one ruler, and that the differing types issued from distinct localities. Such rulers might have been subordinate to a single suzerain.

Cunningham says that not one of the types gives even a single letter of any name. Coin No. 96 of this Collection, which was No. 2 on p. 52 of the Rodgers *Lahore Museum Catalogue*, exhibits three extra *akṣaras*, which must signify either a name, an epithet, or a monetary denomination. This fact did not escape Mr. Rodgers' notice, as he remarked on it, but made no suggestion as to what the name might be. The word is unfortunately slightly off the coin. The first *akṣara* is probably *ra*, and the last looks like *ta*. All that one can see of the second *akṣara* is the lower part of a down-stroke terminating in a slight hook to the left, possibly a letter with the *u* termination.

When I came to examine the British Museum coins, I found another similar specimen, but nothing more of the extra word was legible than the probable *akṣaras* *ta* and *sa*. Both coins have been published in my paper 'Two Coins of Soter Megas', *J.R.A.S.*, July, 1913.

¹ This coin is of what has been called the Mathurā type—see *I. M. Cat.*, vol. i, and Cunningham's *Coins of the Sakas*. I have found it in Delhi and Jagadhri, and it probably was current in what is now the S.E. Panjab. Under the thunderbolt on the reverse side is an object which Cunningham called a monogram formed of the Greek letters Π and Λ, and which Prof. Gardner described as an altar. I think that coin No. 112 clearly shows that this object is merely the lower part of the thunderbolt. The die-sinker's idea of a thunderbolt was vague, and on this coin the bolt is terminated at the ends by a bow and trident respectively.

Α 115	Within reel and pellet border, diademed bust of king to r. W. 196. S. 1.2.	King on horseback to r., followed by flying figure of Nike with wreath. Greek legend ΤΥΑΝΝΟΝΤΟΣ ΗΑΟΥ ΚΟΙΙΑΝΟΥ In exergue a word which has been variously interpreted as ΣΑΝΑΒ and ΣΑΚΑ. On this specimen it looks like ΣΑΚΑ. G. B. Pl. XVI.

¹ This rare type is not represented in the existing *B. M. Cat.*, but was described and illustrated by Cunningham in *The Coins of the Sakas*. The British Museum now possesses several specimens, and these clearly show the absence of any inscription: the attribution is certain owing to the presence of the characteristic Soter Megasthenes symbol. The Hindu symbol of the pot and plant is common to this type and to the bilingual type. It is found on ancient Hindu coins, e.g. *I. M. Cat.*, vol. i, Pl. XXII. 19.

² The coins of the ruler whose name has been read as Heraos or Miaos, have been much discussed. Full references are given on p. 9 of Prof. E. J. Rapson's 'Indian Coins' (*Grundriss der*

indo-arischen Philologie und Altertumskunde), to which may now be added Mr. J. Kennedy's recent note in *J.R.A.S.*, 1913, pp. 124-7. Cunningham remarks that these coins are altogether exceptional, as they consist entirely of tetradrachms and obols. He should have qualified this observation owing to his own tentative attribution of a copper coin to Heraos. The Parthian style of the bust on the tetradrachm, together with the design of the king on horseback accompanied by the flying Nike, connect this currency with that of the Indo-Parthians, amongst which I have put it. On the other hand Prof. Gardner held that Heraos was a king of the Sakas owing to the presence of the word he read as ΣΑΚΑ. Yet again we have the additional epithet which may be interpreted as Kushānou, and Heraos then becomes a Kushān ruler, as held by Mr. Vincent Smith—*I. M. Cat.*, vol. i.

While the tetradrachm is Parthian in style, the obols appear to have been directly imitated from those of the early Bactrian rulers.

¹ A word of explanation is required here as to why the coins of Hyrkodes and the other rulers placed after him in this Catalogue, have been included in this section. I have placed Hyrkodes and Phseigacharis with Heraos because of similarity of the types. The coins of Rajula, of the two Odumbara rajahs, and the Indo-Chinese coins are of approximately the same period, and have been included because they were in the Collections from which the present Cabinet was formed, and though worthy of record, would otherwise have remained uncatalogued. I have separately noted other points of interest.

that is to say, a similar inscription to that on No. 130. I find that the coins of this type in the British Museum have already been included by Prof. E. J. Rapson in the currency of Rājula, but the present is the first publication of their attribution to this ruler. Also see Lead Coins, No. IX of Part II of Mr. Vincent Smith's 'Numismatic Notes and Novelties', J.A.S.B., 1897. Coin No. 115 of Part I of the White King *Sale Catalogue* is a lead coin of this type, and was wrongly attributed to Strato II.

¹ All the Indo-Chinese coins come from Khotan and its neighbourhood, and must be referred to the first and second centuries A.D. A full and interesting description of this currency is contained in Dr. Hoernle's paper 'Indo-Chinese Coins in the British Collection of Central Asian Antiquities', *Indian Antiquary*, 1899. Two sizes are known in copper only, the large and the small, and the specimens in this Collection belong to the latter category. The Chinese legend merely gives the monetary denomination of the coins. The large variety is equivalent to one *liang* and four *tchu* of copper money, while the small variety weighs six *tchu*.

The name of the ruler is given on the Kharoṣṭhi side. Cunningham read the name on the large coin known to him as *Heramayasa* (Hermaios)—see his *Coins of Alexander's Successors in the East*—but this is incorrect. The name is given by Dr. Hoernle as *Gugramaya*, and he remarks that there are altogether five varieties of royal names, all commencing with *Gugra*.

SECTION III

COINS OF THE KUSHĀNS

INTRODUCTION

THE few and disconnected facts that have been gleaned concerning the Greek principalities in Bactria and India, have come almost entirely from the study of their coins. But we have more detailed information about the time and immediate cause of their fall. Occasional notices in Strabo and Justin give us the bare information that an irruption of Scythian tribes of various names—Asii, Pasiani, Tochari, and Sakarauli—made an end of the Greek dominion in Bactria and Sogdiana. The classical notices have been thoroughly discussed by J. Marquart in his brilliant work *Ērānšahr* (Berlin, 1901), a historical geography of the old Indo-Scythian territories between the Oxus and Indus. For more precise data as to the time of this event, the true origin of the tribes which finally supplanted Greek rule, and the spread of their power towards India, we have to turn to other sources of information, namely the records preserved for us in the annals of the Chinese dynasty of the Hans.

“A statement recorded during the period of the Former Han Dynasty (206 B.C.—A.D. 24) clearly identifies the Great Yue-chi people (*Ta-Yue-chi*) with the invaders of Bactria in the second century before the Christian era. Originally, so the text asserts, the Great Yue-chi lived a nomad life beyond the north-western frontiers of China. With their flocks they moved hither and thither over those vast tracts like their neighbours, the hordes of the Hiung-nu. In 201 B.C., and again in 165 B.C., they were attacked by the same powerful Hiung-nu, the Huns of later days. On the last occasion their king was slain, and his skull turned into a drinking bowl, and the Yue-chi themselves, driven to forsake their camping grounds, wandered far to the west. Here, after a victory over the Ta-hia, the nation occupying Bactria, the Great Yue-chi settled down in the tracts north of the Oxus. It was there that the Chinese envoy Chang-k'ian, on his famous mission which first opened up a knowledge of the ‘Western Regions’ to the Chinese, came across them in 126 B.C. Some time after his visit, in what year does not definitely appear, the Great Yue-chi crossed the Oxus, and made themselves masters of the Ta-hia capital south of that river. The territory they thus secured was bounded to the west by the A-si,

or the kingdom of the Arsacidae, and to the south by Ki-pin, that is, the Upper Kābul Valley. . . . The victors split up the conquered territory among five chiefships, and remained in it for a hundred odd years. Then one of the five princes, named Kieu-tsieu-khio according to the Chinese account, and chief of the Kuei-shuang tribe, attacked and conquered the other four Yue-chi principalities. Uniting thus the whole people under one sway, he founded the mighty Kuei-shuang empire, so named after the ruling family. Led by this king the Yue-chi crossed the Hindukush mountains, the southern frontier of Bactria. Kao-fu, the present Kābul, fell before them, and they made themselves complete masters of Ki-pin, the valley of the Upper Kābul River, and the adjoining territories. After these conquests Kieu-tsieu-khio died in the eightieth year of his age. His son and successor Yen-kao-tsin-tai, according to the Annals of the Later Han Dynasty, conquered India proper, and established there generals who ruled in the name of the Yue-chi. From this time forward the Yue-chi nation is said to have grown rich and powerful.

“The information here briefly summarized from the Chinese Annals, gives a clear indication of the rise of one of the greatest empires of ancient India. It likewise renders possible the correct interpretation of the data which have come down to us in the shape of the coins and other remains of this fascinating epoch. To begin with, we learn from it the true origin and name of the people which formerly, on the strength of notes by a few Greek geographers, we had known under the convenient but really very indefinite title of Indo-Scythians. In the Kuei-shuang tribe of the Chinese records, European scholars very soon recognized the Kushāns of the Armenian Chroniclers. This name also led to the exact determination of a large and interesting series of coins from which, besides the authentic names of the Kushān rulers, we are enabled to learn also much of importance concerning the history of their dominion.” ‘White Huns and Kindred Tribes in the History of the Indian North-West Frontier’, by Sir Aurel Stein, *Indian Antiquary*, 1905.

In the Introduction to Section I of this work, I have stated that coins of the Indo-Greek prince Hermaios are known which bear on the Kharoṣṭhi side the name of a barbaric ruler, Kujulakasa, the Kushana. When without further alteration of the type, we find that the name of this Kushān chief in the form ΚΟΖΟΥΛΟ ΚΑΔΦΙΖΗC makes its appearance also on the Greek side of the coinage, and the name of Hermaios finally disappears, then it becomes certain that this Kadphises, leader of the Kushān race, was the conqueror who subverted the Greek dominion in Kābul, and that in him we must recognize the ruler whose name the Chinese

transcription, always cumbersome and phonetically defective, reproduces as Kieu-tsieu-khio.

On the strength of the numismatic evidence we must regard as successors of Kozoulo or Kujula Kadphises two other Kushān princes who call themselves on their coins ΚΟΖΟΛΑ ΚΑΔΑΦΕΣ (Kuyulakaphsa) and ΟΟΗΜΟ ΚΑΔΦΙΧΣ (Vimakapiśa) respectively. Probably Kozola Kadaphes is to be identified with Kozoulo Kadphises. In any case ΟΟΗΜΟ ΚΑΔΦΙΧΣ, often transliterated as Wema Kadphises,¹ is admitted to be the ruler called by the Chinese Yen-kao-tsin-tai or Yen-kao-tchen, who overthrew both Greeks and Sākas, and was the conqueror of Northern India. This conclusion is borne out by the character of the coinage. The monetary issues of Kozoulo (Kujula) Kadphises are known in copper only. Those modelled on the Hermaios currency have the bust of Hermaios obverse, and standing Herakles reverse. Other known types are the bull and Bactrian camel coins, and the so-called Macedonian soldier type. The obverse design of the latter piece is a conventional head turned to the right, and wearing a peculiar helmet with two recurved horns; the reverse is that of an armed soldier wearing a helmet which resembles a *kausia*. Of the two types bearing the name of Kadaphes, one shows in the representation of the king's head an unmistakable imitation of the head of one of the early Roman Emperors. The other is the seated Buddha and standing Zeus type. On none of these are we given a portrait of Kujula Kadphises himself. In the Greek legends of the coins the only regal epithet used by the king is a title corresponding to the Turkish word *jabgu*, 'chief'—see footnote in this Catalogue descriptive of the Buddha type of Kadaphes, also Mr. J. Kennedy's 'The Secret of Kanishka', *J.R.A.S.*, 1912, pp. 669, 1002, 1003. The only inscriptions that go further are the Kharoṣṭhi legends on the Kujula Kadphises bull and camel type. In these the king is called 'The great king, the king of kings, the son of heaven'—see Cunningham, *Num. Chron.*, 1892, p. 66. The Greek legends on this type are quite barbarous and illegible.

In striking contrast with the above coins are those of Wema Kadphises. This monarch has an extensive bilingual gold and copper coinage of striking design and good workmanship. The obverse design gives us a life-like representation of the Central Asian invader. As a rule we see him standing, clothed with a long open coat reaching to the knee, very similar to the Turkish heavy overcoat. He also wears a tall cap and long boots. The reverse, without a single exception, is confined to the worship of the Indian deity Śiva. The

¹ Or preferably Vima Kadphises. See p. 11 of Professor E. J. Rapson's *On the Alphabet of the Kharoṣṭhi Documents*, Paris, 1905.

legends are plainly legible in both languages. On the copper coinage the king is given the full suzerain titles of ΒΑΣΙΛΕΥΣ ΒΑΣΙΛΕΩΝ ΚΩΤΗΡ ΜΕΓΑΣ, while in the Kharoṣṭhi inscription he is called 'The great king, king of kings, lord of the world, the Mahiśvara, the defender'. Mahiśvara is a name of Śiva, so perhaps Vima Kadphises claimed to be an incarnation of the Indian destroying deity. Only one single piece is known in silver of the Kadphises dynasty, and that is a coin almost exactly resembling the ordinary small copper type of Vima Kadphises, but struck in silver—*B. M. Cat.*, Pl. XXV. 11. Cunningham suggested that this piece was intended for the equivalent of the Roman silver *denarius*—*Num. Chron.*, 1892, p. 70. But if the coin were struck for ordinary circulation, it is very improbable that it would have remained unique for more than seventy years—the coin is figured in *Ariana Antiqua*, published in 1841. I should be inclined to regard it in the nature of a proof-piece.

In the chronological order generally accepted by numismatists up to the present, the Kadphises group was succeeded by the following Kushān princes in the order named :

Kanishka.

Huvishka.

Vasu Deva.

Between Kanishka and Huvishka came a ruler named Vāsishka, but his coins, if he issued any, have not yet been identified. It was in the times of Kanishka and Huvishka that the power of the Kushān Empire reached its zenith. According to the *Rājataranginī* both rulers were Turushkas, that is to say, of Turkish stock. So probably was Vasu Deva, but he assumed an Indian name. These questions were discussed by Prof. Sten Konow of Christiania in a paper on the nationality of the Kushanas, read before the International Congress of Historical Studies, London, 1913. Their barbarian origin notwithstanding, these rulers testified to their religious leanings by the founding of numerous monasteries and shrines. The name of Kanishka is prominent in the history of Buddhism in North-West India.

Kanishka, Huvishka, and Vasu Deva coined extensively in gold and copper, and these coins exhibit legends in the Greek script alone. The only possible exception to this statement is the unique bilingual copper piece which may have contained the name of Huvishka—Cunningham, *Num. Chron.*, 1892, p. 82. In addition to this fact, the coins are differentiated from the issues of the Kadphises group by their general design and style. The issues of the Kanishka group are found in such profusion throughout North-West India that this

fact alone is a clear indication of the power and prosperity of the Kushān rule. Sir Aurel Stein has remarked that the copper coins of Kanishka and other Kushān sovereigns are to be got in such numbers in the bazars of the Western Panjab, Kashmir, and Kābul, that one might almost say that they have remained in circulation for eighteen centuries. Gold coins also of Kanishka and Huvishka have come to light in these parts in relatively large numbers.

The effigy of Kanishka on the coins closely resembles the standing figure of Vima Kadphises, and is radiate. On the small gold pieces we are given a half or quarter length portrait, but this is quite distinct from the similar portraiture of Vima Kadphises. The usual representation of Huvishka on his abundant gold coinage is a characteristic head or half-length figure in four different styles—see Cunningham, *Num. Chron.*, 1892, p. 98. On the copper coins the king is generally represented as riding an elephant, reclining on a couch, or seated in a cross-legged attitude. He is never shown standing, as on the coins of Vima Kadphises and Kanishka. But the monetary issues of Vasu Deva invariably depict him in an attitude closely resembling the standing figure of Kanishka. The reverse sides of the coins of Kanishka and Huvishka present us with a strange and extensive gallery of deities with Greek, Buddhist, Indian, and Iranian names. Mr. J. Kennedy remarks that it was from Babylonia and Mesene that Kanishka derived the greater part of his pantheon, a pantheon perhaps without an equal until Heliogabalus in his youthful extravagance assembled all the gods of the Empire on the Capitol at Rome to do homage to the black stone of Emesa—‘The Secret of Kanishka’, *J. R. A. S.*, 1912, p. 1003. In his *Coins of the Kushāns*, Cunningham gives a list of thirty-three types. The deities, mainly Zoroastrian in character, are also described in Stein’s *Zoroastrian Deities on Indo-Scythian Coins*, and in the *British Museum Catalogue*. For other references see Professor E. J. Rapson’s *Indian Coins*, p. 18, § 73. The full pantheon of some thirty deities is confined to the medals of Kanishka and Huvishka. Vasu Deva figures only the goddesses Nana and Ardokhsho, and the Indian Oesho or Śiva. Much has already been written on this subject, and I do not propose to deal with it at any greater length in this Introductory Note. A full list of the deities is given in the Catalogue.

It would seem that not long after the reign of Vasu Deva, the external power of the Kushāns was considerably reduced. The rise of the Gupta Empire is dated from the fourth century, and it would appear that the Kushān dominion was forced back into the territories where it had originally grown into power, the Kābul Valley, and Gandhāra. It is to this decadent period that we must ascribe the

coins issued by kings using the names of Kanishko and Vasu (Deva). Gold coins of the Vasu Deva type continued to be struck in Gandhāra by chiefs of the original Yue-chi stock, who are usually known as the Lesser Kushāns. The so-called Kushāno-Sassanian pieces, the result of Sassanian invasions of the Kābul Valley, are found on the Sistān side, and were probably struck in the fourth and fifth centuries of our era. A copper coinage, very much debased, but undoubtedly designed on the old Kushān model, persisted in Kashmir from the sixth to the sixteenth century.

The widest divergence of opinion exists as to the position in time, and the sequence of the Kadphises and Kanishka groups of Kushān kings. Numismatists have usually had no hesitation in placing the Kadphises group before the Kanishka group, and I have followed this convention. For a typical presentment of this view see H. Oldenberg's 'The Era of Kanishka', *Journal of the Pali Text Society*, 1912. Mr. Vincent Smith—*I. M. Cat.*, vol. i, p. 64—holds that the following chronology of accessional dates is approximately correct:

Kadphises I	A. D. 45 or 50.
Kadphises II (Wema Kadphises)	A. D. 85.
Kanishka	A. D. 120.
Huvishka	A. D. 150.
Vasu Deva	A. D. 180.

No less than eleven theories have been broached regarding the date of Kanishka. They carry the initial year in which the Kushān inscriptions are dated over a period ranging from 58 B. C. to A. D. 278—see V. A. Smith, 'The Kushān Period of Indian History', *J. R. A. S.*, 1903, and R. D. Banerji, 'The Scythian Period of Indian History', *Indian Antiquary*, 1908. Dr. J. F. Fleet holds that Kanishka established the era dating from 58 B. C., which subsequently became known as the Vikrama era. This view involves the assumption that the Kanishka group preceded the Kadphises kings. It is only a year ago that Mr. J. Kennedy in his paper, 'The Secret of Kanishka', *J. R. A. S.*, 1912, has with much learning and ingenuity advocated this theory afresh. A reply by Dr. Thomas, Librarian of the India Office, and the subsequent discussion, are reported in the *Journal of the Royal Asiatic Society* for the present year, 1913. The entire ground is fully covered by these contributions, to which I refer the reader. The final decision still awaits the excavator's find.

The copper issues of the Kushāns are strongly represented in this Collection. The Buddha type of Kadaphes makes its appearance in a Museum Catalogue for the first time, and very few of the copper types of Kanishka and Huvishka are missing. There are four specimens

of a new type belonging in all probability to Kanishka. As regards the gold coinage, there are a fine double stater of Vima Kadphises, and a few specimens of the rarer types of Kanishka and Huvishka. But on the whole the gold Kushān issues are very inadequately represented, and the Collection in this respect is immeasurably inferior to the superb British Museum Cabinet. However, as I have already remarked in the Introduction to the first Section, it must be remembered that the British Museum contains Sir Alexander Cunningham's entire Collection, and Cunningham's Collection represents the cream of the entire output of Indo-Greek coins for more than fifty years (1840–1895 *approx.*).

A word as to forgeries. Mr. Vincent Smith mentions certain very clever forgeries of rare Kushān gold coins which were so well executed that they could be ascribed with confidence to the skill of a Rawalpindi dealer who was able sometimes to deceive the very elect, including Sir Alexander Cunningham himself—*I. M. Cat.*, vol. i, p. 65. The Lahore Museum Cabinet of Forgeries contains one or two of the original dies from which these imitations were struck. A numismatist who has the advantage of collecting in India itself, and is in constant touch with the Rawalpindi dealers, can generally detect even the best of their manufactures. But Mr. J. Allan has pointed out to me that some of the most realistic forgeries go back to earlier years. The Kushān gold coins in the British Museum, most of which came from Cunningham, do not include a single specimen of the characteristic Rawalpindi imitations. A few gold forgeries kept in the British Museum Cabinet have been there more than sixty years. One of these, a coin of Vasu Deva, is illustrated in *Asiatic Researches*, vol. xvii (1832). Cunningham wrote about forgeries as early as 1842. It is probable that some of the imitations to which Mr. Vincent Smith refers, were made before the days of the dealer he suspects.

As regards the Rawalpindi dealers, it must be remembered that the best of the genuine coins and other antiques still pass through their hands. They are well known throughout the Frontier, they constantly visit the likely find spots, and spare no pains in acquiring valuable specimens.

Several of the rarer Kushān gold types are forged, but I have never seen a forged copper coin.

¹ On the supposition that ΣΤΗΡΩΣ is a contraction of ΣΩΤΗΡΩΣ, Cunningham offered a conjectural explanation of the puzzling particle ΣΥ, which he tended to regard as a prefix to the name ΕΡΜΑΙΟΥ—p. 46 of *Coins of the Kushāns*. But Professor E. J. Rapson has rightly pointed out that ΣΥ is really attached to ΣΤΗΡΩΣ, and discusses the possibility of a single epithet ΣΤΗΡΩΣΣΥ, corresponding to some Kharoṣṭhi word—see 'Two Notes on Indian Numismatics', *J.R.A.S.*, 1897.

Æ 30	As on No. 29. S. 6.	As on No. 29. G. B.
Unrepresented type :		
As type (a), but with Nike on the reverse. Æ Cunningham, <i>Coins of the Kushāns</i> , p. 65.		

little coins deserve to be reckoned among the most remarkable of recent numismatic discoveries. They add two specimens to the short list of Kuṣāṇa coins bearing the image of Buddha, and prove that the introduction of that image in its conventional form does not date from the reign of Kanishka, but goes back at least to the reign of Kadaphes, one of his predecessors. . . . These Buddha pieces are assigned to Kadaphes on account of the legend XOPANCY, which is distinct on one of them, and which is peculiar to the coins of Kadaphes.' The seated Buddha occupies one side, while the other, according to Mr. Vincent Smith, bears a Śiva and bull design. Later on he published a third similar Buddha coin of Kadaphes, of the Zeus (described by Mr. Vincent Smith as a king or god) instead of the Śiva and bull type—Part III of 'Numismatic Notes and Novelties', *J.A.S.B.*, 1898. There was a good specimen in the White King Collection, *Sale Catalogue*, Part I, No. 360 (illustrated in Plate IV); I possess four specimens, and have seen two or three more. But all these latter are of the Zeus type, and I think that a careful examination of the Plate illustrating Part II of 'Numismatic Notes and Novelties', and comparison with the reproductions of the Zeus type, will show that the two specimens first published are identical in type with the later ones, and that all are of one and the same type—that of Buddha, and the king or god usually called Zeus, cp. the obverse design of coins *B.M. Cat.*, Pl. XXIII. 2 and 3, and XXIV. 1.

As regards the legends. The White King coin plainly shows the Kharoṣṭhi *akṣaras* - - - *la Kadaphasa* - - -, while one of my specimens has - - - *ṣanasa* - - -. The words *Kujula Kadaphasa Khusanasa* at once suggest themselves, and the legend is probably completed by one more word. The new name-form Kadaphasa is interesting. If the name Kadaphes is only another form of Kadphises, and if the ruler Kadaphes is identical with Kadphises I, a view suggested by Cunningham and J. Marquart, and followed by Mr. Vincent Smith in Part I of the *Indian Museum Catalogue*, we have the four different Kharoṣṭhi forms of the name—Kasa (on the ordinary Kadphises I coins), Kaphsa (on the ordinary 'Kadaphes' coins), Kadapha on these Buddha coins, and Kaṭi on the 'Macedonian soldier' type of Kadphises I—see coin No. IV of Part III of 'Numismatic Notes and Novelties'. Our only evidence is the coins, and these exhibit four different names in the Kharoṣṭhi and two in the Greek.

On pp. 208 and 209 of his *Ērānshahr*, Berlin, 1901, J. Marquart discusses the legends on the coins of Kadphises and Kadaphes. The Kharoṣṭhi *Kuṣanayavugasa* or *Khusanayawisa* has the Greek equivalent XOPANCY ZAOOY, and means 'of the *jabgu* of the Kushāns'. *Jabgu* is a well-known Turkish word for 'leader' or 'king'. See also Mr. J. Kennedy, 'The Secret of Kanishka', *J.R.A.S.*, 1912, pp. 669, 1002, and 1003. Marquart holds that ΚΟΖΟΛΑ ΚΑΔΑΦΕC is merely a variant of ΚΟΖΟΥΛΟΥ ΚΑΔΦΙΖΟΥ, from a compound name *Kujula Kadphises*. It is held that *Kujula Kadphises* reigned for quite fifty years, and a variety of types is to be expected.

¹ The strange and extensive gallery of gods and goddesses with their Greek, Indian, and Persian names, which adorns the currencies of Kanishka and his successor Huvishka, has been discussed in various publications, of which I may mention Cunningham's *Coins of the Kushāns* and Sir A. Stein's *Zoroastrian Deities on Indo-Scythic Coins*—see p. 175 of this Catalogue. In the case of Huvishka, however, the workmanship of the coins is so poor that specimens which at first sight appear to present new and unknown deities are sometimes only variations of old types with names blundered and deities wrongly labelled.

² Copper coins of Kanishka with his Greek title of *Basileos basileon*, are obtainable, though much rarer than the common type bearing the title of *Shāo*. The Greek type of gold coin is exceedingly rare. In the British Museum Collection are one Helios, one Hephaistos, and two with the deity Salene. No others are known up to the present. For descriptions see Cunningham, *Coins of the Kushāns*.

¹ The ordinary type of Kanishka's copper currency is usually found in three sizes—the large, half, and quarter. Occasionally smaller coins come to hand, e.g. No. 82. This Collection is fairly complete. It includes the rare middle size of NANA, but the following sizes and types are wanting: small AᐅᐅO, middle-sized, and small standing Buddha, and the sitting Buddha known in the large size only. Cunningham mentions the existence of a small-sized AᐅᐅO, but it is not in the B. M. Collection, and I do not otherwise know of it.

Coins Nos. 68–113 vary in the legibility of their obverse inscriptions, but these remain invariable throughout.

The Greek legend probably records the name of Sakya-Muni Buddha. See Cunningham, <i>Num.</i> <i>Chron.</i> , 1892, pp. 57 and 81. Also <i>B. M. Cat.</i> , p. lxvi.
(δ) <i>Type: king seated on throne, and deity; copper, round</i>		
114 ¹ Three coins	King seated on wide throne with back and sides, with head turned to l.; wears a peculiar wide-brimmed hat, and volumi- nous trousers. To r. letters probably reading --- NHPKI W. 68. S. 65.	OHPO Two-armed Śiva exactly as on No. 110. To l. M. 4.
115	S. 65. "	MAO Moon-god as on No. 75. To l. M. 4. Pl. XVIII.

¹ These four coins of the king seated on throne type were in the Rodgers Collection, and are briefly mentioned in his Catalogue, but are otherwise unknown and unpublished. I think the attribution to Kanishka is certain because of the size and style, which are quite different from those of Huvishka's copper currency. This new type is known with OHPO and MAO reverses only. I found a specimen of the MAO variety some years ago in Ambala City, and have identified another in the B. M. Collection. I know of no others.

158	W. 242. " S. 1.	NANA Draped goddess with short sceptre to r. To r. M. 5.
159 Two coins	W. 129. " S. 1.	ΦAPO Male deity to l. with long sceptre in l. hand and purse in out- stretched r. hand. To l. M. 6.
160	W. 173. " S. -9.	ΦAPPO As on No. 159. Pl. XIX.
161 Three coins	W. 154-176. " S. -9.	APΔOXPO Goddess with cornucopiae to r. To r. M. 6. Pl. XIX.

¹ OAAO coins of Huvishka are very rare. Sir A. Cunningham knew of two—*Coins of the Kushāns*, p. 108. There are four in this Collection. This name is only found on the copper money of Kanishka and Huvishka.

Metal No.	Obverse	Reverse
Æ 162	As on No. 137. W. 152. S. 1.	HPAKHAO Herakles with club and lion's skin standing to front. To l. M. 6. Pl. XIX.
163	W. 233. S. 1.	ΔITN (<i>sic</i>) Four-armed deity to l. To l. M. 6.
164 ¹	W. 241. S. 1.1.	OHA Deity, nimbate, with fillet in outstretched r. hand. To l. M. 6.
165	W. 223. S. .95.	Male deity; coin rubbed and illegible.
166	W. 80. S. .85.	Deity; coin barbarous. To l. M. 4.
167	but elephant-rider to l. W. 162. S. .8.	Figure, probably of king, seated cross-legged.
168	As on No. 137. W. 54. S. .8.	Deity; coin barbarous.
169	W. 64. S. .8.	"

¹ Sir A. Cunningham considered AOH to be another name for AΘΠO, and discussed the point at some length—*Coins of the Kushāns*, p. 133. On this coin we have a figure resembling that of AΘΠO, with the legend OHA. I should be inclined to consider the fragmentary labels in the Greek script on copper coins of Huvishka as blunders made by ignorant die-sinkers, unless there were good evidence to the contrary.

¹ The copper coins of Huvishka exist in various denominations, but these are somewhat vague, and I have made no attempt to subdivide the coins according to their respective weights.

Metal No.	Obverse	Reverse
--------------	---------	---------

Unrepresented types :

Staters :

With obverses of Cunningham's types A, B, or C, and the following deities :

- (i) ΑΡΑΕΙΧΡΟ
- (ii) ΑΡΟΟΑΣΤΟ
- (iii) ΜΑΑΧΝΟ
- (iv) ΧΕΡΟ
- (v) ΝΑΝΑΡΑΟ
- (vi) ΝΑΝΑ (seated on lion)
- (vii) ΟΑΧΡΟ
- (viii) ΝΑΝΑ with ΟΗΡΟ
- (ix) ΡΑΟΡΗΟΡΟ
- (x) ΡΩΜ (ΡΙΟΜ)
- (xi) CΑΡΑΠΟ
- (xii) CΚΑΝΔΟ ΚΟΜΑΡΟ ΒΙΖΑΓΟ
- (xiii) CΚΑΝΔΟ ΚΟΜΑΡΟ ΒΙΖΑΓΟ ΜΑΑΧΝΟ
- (xiv) ΩΡΟΝ
- (xv) ΟΗΡΟ

With obverse of Cunningham's type D, and deity :

- (xvi) ΜΙΘΡΟ

With obverse of king seated cross-legged, and deities :

- (xvii) ΗΡΑΚΙΛΟ
- (xviii) ΝΑΝΑ

With obverse of king on elephant, and deity :

- (xix) ΑΡΔΟΧΡΟ

Quarter staters :

With obverses of types A, B, C, or D, and deities :

- (xx) ΑΡΔΟΧΡΟ
- (xxi) ΜΑΟ
- (xxii) ΜΙΘΡΟ
- (xxiii) ΝΑΝΑ
- (xxiv) CΑΡΑΠΟ
- (xxv) ΦΑΡΡΟ (ΦΑΡΟ)

Copper coins :

- (xxvi) Type (δ) with Nana reverse.
- (xxvii) Type (δ) with design of king kneeling before Nana—Cunningham, *Num. Chron.*, 1892, p. 117.
- (xxviii) Type (ε) with deity ΑΡΔΟΧΡΟ
- (xxix) Type (β) with reverse design of king kneeling before Nana—Cunningham, *Num. Chron.*, 1892, p. 118.

I have made no attempt above to distinguish between the varieties of the main types, the only exception being the reference (vi) to an interesting coin. I have also excluded probable blundered names such as ΔΟΧΡΟ, ΟΔΙΙΟ, and ΟΝΙΑ. All the above in practically every known variety are in the superb British Museum Cabinet.

Many types are forged, forgeries of types (xii), (xiii), and of the ΜΑΝΑΟΒΑΓΟ type (No. 128 a) being particularly abundant.
